MassHealth

Standard Companion Guide

Health Care Eligibility/Benefit Inquiry and Information Response (270/271)

Refers to the Implementation Guides Based on
ASC X12N Version 005010X279A1

May 2020

For Trading Partner Testing Purposes

Disclosure Statement

This *MassHealth Standard Companion Guide* ("Companion Guide") serves as a companion document to the corresponding *ASC X12N/005010X279 Health Care Eligibility/Benefit Inquiry and Information Response (270/271)*, its related Addenda (005010X279A1), and its related Errata (005010X279E1). MassHealth strongly encourages its Trading Partners to use this Companion Guide in conjunction with the *ASC X12 Implementation Guide* to develop the HIPAA batch transaction. Copies of the ASC X12 Transaction Report Type 3s (TR3s) are available for purchase at http://store.x12.org/store. The document further specifies the requirements to use when preparing, submitting, receiving, and processing electronic health care administrative data.

This document supplements, but does not contradict, disagree, oppose, or otherwise modify the 005010X279 in a manner that will make its implementation by users out of compliance. Tables contained in this Companion Guide align with the CAQH CORE v5010 Companion Guide Template. The template is available at www.caqh.org.

About MassHealth

MassHealth is the Medicaid and Children's Health Insurance Program (CHIP) for Massachusetts. MassHealth provides comprehensive health insurance and dental coverage for eligible individuals, families, and people with disabilities across the Commonwealth of Massachusetts. In 2018 the program served approximately 1.85M residents in the state. MassHealth's coverage is managed and facilitated through an array of programs, including Accountable Care Organizations (ACOs) and Managed Care Organizations (MCOs), which enable members to choose the plan that best meets their needs. The agency is nationally recognized for providing high quality care in an innovative and cost-effective manner. See www.mass.gov/masshealth.

Medicaid Management Information System and Provider Online Service Center

The Medicaid Management Information System (MMIS) and the Provider Online Service Center (POSC) both support the web-based provider portal that is utilized by MassHealth providers and relationship entities to access, submit, and retrieve transactions and information that support the administration of health care to MassHealth members. The POSC provides access to online functions such as member eligibility verification, claim submission and status, prior authorization, referrals, preadmission screening, online remittance advices, and reports. The tool also facilitates the submission and retrieval of HIPAA ASC X12 transactions.

Preface

This *MassHealth Standard Companion Guide* to the *005010 ASC X12N Implementation Guide* clarifies and specifies the data content when exchanging transactions electronically with MassHealth. The *MassHealth Standard Companion Guide* is not intended to convey information that in any way exceeds or replaces the requirements or usages of data expressed in the Implementation Guides. Neither the Executive Office of Health and Human Services nor MassHealth is responsible for any action or inaction, nor the effects of such action or inaction, taken in reliance on the contents of this guide.

Contents

(continued)

1. Introduction

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) requires MassHealth and all other health insurance payers in the United States to comply with the electronic data interchange (EDI) standards for health care as established by the Secretary of the U.S. Department of Health and Human Services (HHS). The ASC X12N implementation guides are the standards of compliance for electronic health-care transactions.

■ SCOPE

The standard adopted by HHS for electronic health-care transactions is ASC X12N Version 005010, which became effective January 1, 2012. The unique version/release/industry identifier code for the 270/271 Health Care Eligibility/Benefit Inquiry and Information Response transaction is 005010X279A1.

This Companion Guide assumes compliance with all loops, segments, and data elements contained in the 005010X279A1. It defines the requirements for HIPAA transactions submitted to and/or received from MassHealth.

■ OVERVIEW

MassHealth created this Companion Guide for its Trading Partners to supplement the ASC X12N Implementation Guide. This guide contains MassHealth-specific instructions related to the following.

- Data formats, content, codes, business rules, and characteristics of the 270/271 electronic transaction;
- Technical requirements and transmission options; and
- Information on testing procedures that each Trading Partner must complete before transmitting electronic transactions.

The information in this document supersedes all previous communications from MassHealth about this 270/271 electronic transaction. The following standards supplement those outlined in the MassHealth provider manuals. These standards in no way supersede MassHealth regulations.

Use this guide in conjunction with information found in your MassHealth provider manual.

■ REFERENCES

The *ASC X12N Implementation Guide* specifies in detail the required formats for transactions exchanged electronically with an insurance company, health-care payer, or government agency. The Implementation Guide contains requirements for the use of specific segments and data elements within those segments and applies to all health-care providers and their Trading Partners. It is critical that your IT staff and/or software vendor review this document in its entirety and follow the stated requirements to exchange files with MassHealth while maintaining HIPAA compliance.

The Implementation Guides for ASC X12N and all other HIPAA standard transactions are available electronically at http://store.x12.org/store.

■ ADDITIONAL INFORMATION

The intended audience for this document is the technical and operational staff responsible for generating, receiving, and reviewing electronic health-care transactions. In addition, this information should be shared with the provider's billing office to ensure that all accounts are reconciled in a timely manner.

2. Getting Started

■ WORKING WITH MASSHEALTH

MassHealth Trading Partners can exchange electronic health-care transactions with MassHealth by directly uploading and downloading transactions via the Provider Online Service Center (POSC) or system-to-system using the MassHealth connectivity submission method. Submitters must determine whether they will utilize the industry standard, Simple Object Access Protocol (SOAP)/ Web Services Description Language (WSDL) or HyperText Transfer Protocol (HTTP) Multipurpose Internet Mail Extensions (MIME) Multipart Web service to support the submission of transactions via MassHealth's connectivity method.

After determining the transmission method, each Trading Partner must successfully complete testing of the HIPAA transaction before testing the MassHealth connectivity submission method. Additional information is in the next section of this companion guide. After successful completion of testing, you may exchange production transactions.

Please contact the MassHealth Customer Service Center at (800) 841-2900 or via email at edi@mahealth.net for assistance with the MassHealth connectivity submission method.

■ TRADING PARTNER REGISTRATION

All MassHealth Trading Partners are required to sign a Trading Partner Agreement (TPA), as described in Section 9 below. If you have elected to use a third party to perform electronic transactions on your behalf, you will also be required to complete an Electronic Remittance Advice (ERA) Enrollment Form. If you have already completed this form, you are not required to complete it again. Please contact the MassHealth Customer Service Center at (800) 841-2900 or via email at edi@mahealth.net if you have any questions about these forms.

■ CERTIFICATION AND TESTING OVERVIEW

All Trading Partners that exchange electronic batch transactions with MassHealth must complete Trading-Partner testing. This includes vendors, clearinghouses, and billing intermediaries that submit on behalf of providers, as well as providers that MassHealth defines as atypical. At the completion of testing, Trading Partners are certified.

Test transactions exchanged with MassHealth should include a representative sample of the various types of transactions that you would normally conduct with MassHealth. The size of the file should be between 25 and 50 transactions.

MassHealth posts on its website a list of vendors, clearinghouses, and billing intermediaries that have completed Trading Partner testing. If a billing intermediary or software vendor submits electronic transactions on your behalf, please view the list on our website. Providers who use a billing intermediary or software vendor do not need to test for electronic transactions that their entity submits on their behalf.

3. Testing with MassHealth

Typically, before exchanging production transactions with MassHealth, each Trading Partner must complete testing. All Trading Partners who plan to exchange transactions must contact the MassHealth Customer Service Center at (800) 841-2900 in advance to discuss the testing process, criteria, and schedule. Trading Partner testing includes HIPAA compliance testing as well as validating the use of conditional, optional, and mutually defined components of the transaction.

Please note that providers submitting the eligibility inquiry request via the POSC using direct data entry (DDE) are not required to test. You must, however, have a valid TPA on file with MassHealth to submit batch and real-time Health Care Eligibility/Benefit Inquiry and Information transactions (270) and receive the Response (271). Under certain circumstances (e.g., version upgrade or structural changes), MassHealth will require Trading Partners to test the Eligibility Inquiry and Response Transaction.

Trading Partners must address the following conditions in any standard test file.

- Member and provider data must be valid for a mutually agreed upon effective date;
- Ability to perform a 270 inquiry using the 12-digit member identification (ID number);
- Ability to perform an inquiry by the member's social security number or Other Agency ID; and
- Ability to perform an inquiry by the member's last name, first name, date of birth, and gender.

Please note that if you supply data for all the data elements, MMIS will process the inquiry based on the hierarchy above. If there is a match, the 271 will return member data. If there is no match, the 271 will return the AAA segment with the appropriate reject code. MMIS will not perform multiple searches based on the data provided in the 270 request.

MassHealth will process these transactions in a test environment to verify that the file structure

and content meet HIPAA standards and MassHealth-specific data requirements. MassHealth will generate and return the response to the Trading Partner. Once this validation is complete, the Trading Partner may submit production transactions to MassHealth.

4. Connectivity with MassHealth/Communications

■ TRANSMISSION ADMINISTRATIVE PROCEDURES

System Availability

The system is typically available 24 hours a day, seven days a week, with the exception of scheduled maintenance windows.

Transmission File Size

The current maximum size for any file submitted to MassHealth is 16MB. Any transaction files submitted to MassHealth that are greater than 16MB will be rejected. If you have any questions regarding file size limits, please contact the MassHealth Customer Service Center at (800) 841-2900. Please note that the POSC does not unzip or decompress files. Transmit all files in an unzipped or uncompressed format.

Transmission Errors

When processing EDI transactions that have Interchange Control Header errors (ISA), an Interchange Acknowledgement (TA1) will be generated for each ISA error. Providers must submit the same ISA and Functional Group Header (GS) values for all ISA-Interchange Control Trailer (IEA) envelopes within the same file with the exception of the date/time and control # data elements. Files submitted with inconsistent values will be rejected in pre-compliance.

Please see Section 8 for additional details on the TA1 process.

If the Interchange Header is valid but the transaction fails compliance, a 999 will generate.

Production File-naming Convention

Files transmitted to MassHealth using the POSC do not need to conform to any file-naming convention. The system will rename files upon receipt and issue a tracking number for reference.

■ RETRANSMISSION PROCEDURE

All files sent to MassHealth should be marked as original transmissions, even if they have been transmitted previously.

■ COMMUNICATION PROTOCOL SPECIFICATIONS

Provider Online Service Center (POSC)

The POSC is a web-based tool accessible via the internet, which aids providers in effectively managing their business with MassHealth electronically. The POSC can be used to

- Enroll as a MassHealth provider;
- Manage a provider's profile information;
- Enter claims via direct data entry (DDE);
- Enter member eligibility requests via DDE; and
- View member eligibility response transactions, upload and download batch transaction files, access reports, and receive messages/communications.

■ CORE CONNECTIVITY SUBMISSION METHOD

MassHealth provides a Committee on Operating Rules for Information Exchange (CORE) connectivity submission method that allows Trading Partners to submit HIPAA transactions from their system directly to the MMIS via internet protocol using one of the two Envelope Standards: HTTP MIME Multipart (Envelope Standard A) or Simple Object Access Protocol (SOAP)/Web Services Description Language (WSDL) (Envelope Standard B) to ensure a standardized safe harbor connectivity. For Envelope Standard B, this system-to-system EDI Web service is supported by a standard CORE schema and WSDL as defined in the section 4.2.2 Specifications for SOAP+WSDL in the Phase II CORE 270: Connectivity Rule Document.

While the HTTP MIME Multipart does not provide a standard schema specification, MMIS implementation of the HTTP MIME Multipart will expect that each data element have the corresponding "name" property that matches the SOAP schema definitions as well as the same "operations" names.

For more information about MassHealth's CORE Connectivity Method, contact the MassHealth Customer Service Center at (800) 841-2900 or by email at edi@mahealth.net.

■ PASSWORDS

Providers using the POSC to submit their EDI transactions must adhere to MassHealth's requirements for use of passwords. Providers are responsible for managing their own data. Each provider is responsible for managing access to their organization's data through the MMIS security function. Each provider must take all necessary precautions to ensure that they are safeguarding their information and sharing their data (i.e., granting access) only with users and entities whom they deem appropriate.

It is equally important that providers know who on their staff have links to other providers or entities and that the provider notify those entities whenever they remove access for that person in their organization. MassHealth is not responsible for any action taken by an individual in MMIS whose access results from a provider's failure to abide by these requirements.

For more information on passwords and use of passwords, contact the MassHealth Customer Service Center at (800) 841-2900.

- The National Committee on Vital and Health Statistics established by Congress to serve as an advisory body to the U.S. Department of Health and Human Services on health data, statistics, and national health information policy. See www.ncvhs.hhs.gov.

Washington Publishing Company (WPC)

- WPC is a resource for HIPAA-required transaction implementation guides and code sets. See http://www.wpc-edi.com/.

6. Control Segments/Envelopes

◼ ISA (INTERCHANGE CONTROL HEADER)

This section describes MassHealth's use of the interchange control segments. It includes the expected sender and receiver codes, authorization information, and delimiters. MassHealth requires that the 270 transaction contains only one patient request when submitted in real-time mode. Therefore, in real-time mode IEA01 must equal 1. The chart below and all charts in this document align with the CAQH CORE v5010 Companion Guide template format. The template is available at www.caqh.org.

270 (Inbound)

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments

C.6	-----	ISA14	Acknowledgement Requested	0	MassHealth does not request interchange acknowledgment (TA1)
C.6	-----	ISA16	Component Element Separator		Value = :

■ GS (FUNCTIONAL GROUP HEADER)

This section describes MassHealth's use of the functional group control segments. It includes the expected application sender and receiver codes. MassHealth requires that the 270 transaction contains only one patient request when submitted in a real-time mode. Therefore, in real-time mode GE01 must equal 1.

270 (Inbound)

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments

C.7	-----	GS02	Application Sender's Code	DMA7384	Eligibility Response from MassHealth providers
				HSN3644	Eligibility Response from HSN providers

C.7	-----	GS03	Application Receiver's Code		Trading Partner ID assigned by MassHealth (10-character MMIS provider ID/service location)

7. MassHealth-Specific Business Rules and Limitations

■ ADDITIONAL INFORMATION FOR MEMBER NAME

The member name segment accepts and returns 60 characters for the last name and 35 characters for the first name as required in the Implementation Guide. However, if submitting a value on a transaction that is greater than what is stored in the MassHealth member database, on the return transaction the following would occur.

- If a match is in the database, the database returns the stored value.
- If no match in the database, the value stored on the original incoming transaction will be returned.

Example

A provider submits an eligibility inquiry transaction (270) with a last name that is 22-characters long, but the database currently stores only 20 of those characters. On the return transaction (271), the provider will receive only the first 20 characters of the last name submitted if a match is found in the database. If for some reason the member name submitted is not a MassHealth member and is not stored on the database (no match found), the last, first, and middle names will be sent back on a return transaction (271), exactly as they were originally submitted.

One or more test files must address the following scenarios.

- Inquiry by 12-character member identification (ID number);
- Inquiry by member's social security number or Other Agency ID; and
- Inquiry by last name, first name, middle initial, date of birth, and gender.

■ AAA ERROR CODE REPORTING (CORE STANDARD)

MassHealth has adopted the AAA Error Code Reporting Rule (Phase II CORE 259) developed by the Council for Affordable Quality Healthcare (CAQH). See https://www.caqh.org/sites/default/files/core/phase-ii/policy-rules/259-v5010.pdf.

The following conditions will return the 271 with AAA segment in the Subscriber loop.

In the 270 transaction, if the subscriber ID or SSN is submitted

- MassHealth attempts the look up using member ID or SSN; if member not found in MassHealth's database, MassHealth will reject the transaction. A 271 returns one AAA segment with AAA03 = '72'.

In the 270 transaction, if the subscriber ID or SSN is not submitted, MassHealth will look up the Subscriber last name, first name, date of birth, and gender submitted in the 270 transaction.

- If all four elements are missing, 271 returns two AAA segments with AAA03 = '73'.
- If the subscriber last name and first name are missing, 271 returns two AAA segments with AAA03 = '73'.
- If the subscriber last name is missing and first name is present, 271 returns one AAA segment with AAA03 = '73'.
- If the subscriber first name is missing and last name is present, 271 returns one AAA segment with AAA03 = '73'.
- If the subscriber last name and first name are present, but the date of birth and gender are missing, 271 returns one AAA segment with AAA03 = '58' and one AAA segment with AAA03 = '74'.
- If the subscriber last name and first name are present, but the date of birth is missing, 271 returns one AAA segment with AAA03 = '58'.
- If the subscriber last name, first name, and date of birth are present but the gender is missing, 271 returns one AAA segment with AAA03 = '74'.

◼ ELIGIBILITY VERIFICATION SYSTEM (EVS) GUIDELINES

To ensure timely and efficient processing of transactions submitted by MassHealth providers and vendors in conformance with Phase I CORE 155: Eligibility and Benefits Batch Response Time Rules, and in accordance with HIPAA ASC X12 and MassHealth policy, providers and vendors must follow the submission guidelines below.

- **ONLY** check eligibility for those MassHealth members to whom you will provide service on that day or the following day.
- **DO NOT** submit your entire roster of MassHealth members unless you are providing services for your entire roster of members that day or the following day.
- **DO NOT** include more than 3,000 member requests in any single ST/SE segment within an eligibility batch file request. ST/SE segments that exceed this maximum number of members will be rejected.
- **YOU MUST INCLUDE** the members Medicaid Identification Number (MID) on the eligibility request, if known.
- **POPULATE ALL** subsequent eligibility requests with the member information received from MassHealth on the prior eligibility response, where applicable.

8. Acknowledgements and Reports

All transaction files uploaded to the POSC generate a confirmation number indicating successful file uploads. A TA1 interchange acknowledgment is generated for all Interchange Control Header (ISA) errors within a batch file, when ISA14 is set to 1. A 999 Implementation Acknowledgement is generated for all batch files that are not rejected due to interchange (ISA) errors. These acknowledgements will be available for download from the POSC and/or retrieved through the MassHealth system-to-system connectivity method.

A TA1 Interchange acknowledgment is generated for all interactive files, with ISA14 set to 1 a 999 implementation acknowledgement is generated for interactive transactions that are not rejected due to interchange (ISA) error but have failed compliance. If multiple errors exist in any of the submitted ISA envelopes, a TA1 will be issued for all ISA envelopes.

■ THE TA1 INTERCHANGE ACKNOWLEDGEMENT

MassHealth will generate a TA1 for all ISA errors. Files must contain the same ISA and GS values for all ISA-IEA envelopes within the same file with the exception of the date/time and control # data elements. Files submitted with inconsistent values will be rejected in pre-compliance. Files that contain multiple envelopes will generate multiple TA1s. For any interchange header error identified in a single envelope MassHealth will generate a TA1 for all interchange headers in the file.

For additional information, consult the *Interchange Control Structures, ASC X12.5 Guide*. To obtain an Implementation Guide, log on to http://store.x12.org/store.

■ THE 999 IMPLEMENTATION ACKNOWLEDGEMENT

Each submission of a batch 5010 X12 file to MassHealth generates a 999 acknowledgement to the submitter. This occurs within one business day from the submission of the 270 transaction with conformance to maximum response time rule defined in Phase I CORE 155: Eligibility and Benefits Batch Response Time Rule.

For a 270 interactive transaction submitted to MassHealth, a system-generated 999 acknowledgement is generated if the transaction is rejected due to a compliance error. For compliant 270 interactive transactions submitted to MassHealth, a 271 response will return. This occurs within 20 seconds of the submission of the 270 transaction with conformance to the maximum response time rule defined in Phase I CORE 156: Eligibility and Benefits Real Time Response Time Rule.

For additional information, consult the *Implementation Acknowledgment for Health Care Insurance (999) Guide*. To obtain an Implementation Guide, log on to http://store.x12.org/store.

Report Inventory

There are no acknowledgement reports at this time.

9. Trading Partner Agreements

Providers who intend to conduct electronic transactions with MassHealth must sign the MassHealth TPA. A copy of the agreement is available at www.mass.gov or by contacting the MassHealth Customer Service Center at (800) 841-2900.

Trading Partners

Electronic Data Interchange (EDI) defines a Trading Partner as any entity (provider, billing service, software vendor, employer group, financial institution, etc.) that conducts electronic transactions with MassHealth. The Trading Partner and MassHealth acknowledge and agree that the privacy and security of data held by or exchanged between them is of utmost priority. Each party agrees to take all steps reasonably necessary to ensure that all electronic transactions between them conform to the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and regulations promulgated thereunder.

Payers have EDI TPAs that accompany the standard Implementation Guide to ensure the integrity of the electronic transaction process. The TPA relates to the electronic exchange of information, whether the agreement is an entity or a part of a larger agreement, between each party to the agreement.

10. Transaction-Specific Information

This section describes how ASC X12N Implementation Guides (IGs) adopted under HIPAA will be detailed through the use of tables. The tables contain a row for each segment that MassHealth has something specific, and additional, over and above, the information in the IGs. That information can

- limit the repeat of loops, or segments;
- limit the length of a simple data element;
- specify a subset of the IGs internal code listings;
- clarify the use of loops, segments, composite and simple data elements; and
- provide other information tied directly to a loop, segment, composite, or simple data element pertinent to trading electronically with MassHealth.

In addition to the row for each segment, MassHealth uses one or more additional rows to describe its usage for composite and simple data elements and for any other information. Notes and comments are placed at the highest level of detail. For example, a note about a code value is placed on a row specifically for that code value, not in a general note about the segment.

270 (Inbound)

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
69	2100A	NM101	Entity Identifier Code	PR	
70	2100A	NM102	Entity Type Qualifier	2	
70	2100A	NM103	Information Source Last or Organization Name		MASSHEALTH
71	2100A	NM108	Identification Code Qualifier	46	Electronic Transmitter Identification Number
71	2100A	NM109	Information Source Primary Identifier		DMA7384
78	2100B	NM109	Information Receiver Identification Number		Enter the 10-character MassHealth provider ID, including Service Location, when the information receiver is an atypical provider. Enter National Provider Identifier (NPI) when the information receiver has an NPI.
98	2100C	REF01	Reference Identification Qualifier	EJ,SY,NQ	If value is submitted on the 270 request, the 271 response will contain the same value along with the subsequent Subscriber Supplemental Identifier.
99	2100C	REF02	Subscriber Supplemental Identifier		MassHealth will return the patient account number or other value on the 271 based on the value in 270.
123	2100C	DTP01	Date Time Qualifier	291	

MassHealth supports multiple search criteria for an eligibility inquiry. An inquiry may be submitted using various combinations of MassHealth member ID, social security number, last name, first name, date of birth, and gender.

Below are the criteria for these options.

■ INQUIRY BY MEMBER ID

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
95	2100C	NM108	Identification Code Qualifier	MI	

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
96	2100C	NM109	Subscriber Primary Identifier		MassHealth 12-digit member ID; MassHealth will return data in this field, including invalid member IDs on the 271.

■ INQUIRY BY SOCIAL SECURITY NUMBER OR OTHER AGENCY ID

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
98	2100C	REF01	Reference Identification Qualifier	SY, NQ	NQ-for Other Agency ID
99	2100C	REF02	Subscriber Supplemental Identifier		SSN or Other Agency ID

■ INQUIRY BY LAST NAME, FIRST NAME, DATE OF BIRTH, AND GENDER

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
93	2100C	NM103	Subscriber Last Name		MassHealth allows a maximum of 20 characters for this search. MassHealth will return the entire value it receives in the 270 transaction when unable to find the member.
93	2100C	NM104	Subscriber First Name		MassHealth allows a maximum of 15 characters for this search. MassHealth will return the entire value it receives in the 270 transaction when unable to find the member.
108	2100C	DMG02	Subscriber Birth Date		MassHealth will return in the 271 the entire value it receives in the 270 transaction when unable to find the member.
109	2100C	DMG03	Subscriber Gender Code		MassHealth will return in the 271 the entire value it receives in the 270 transaction when unable to find the member.

■ **DEPENDENT LEVEL**

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
347	2000D		Dependent Level		The dependent level loops are not used by MassHealth and will not be returned if submitted in 270.

APPENDICES

Appendix A. Implementation Checklist

This appendix contains all necessary steps for implementing the transactions with MassHealth.

1. Call the EDI Help Desk with any questions at (800) 841-2900. Please see Section 5 – Contact Information.

2. Check www.mass.gov/masshealth for the latest information on MassHealth's system.

3. Confirm that you have an EOHHS User Name and/or Provider ID.

4. Confirm that you can access the live system (and the test environment, if testing) with your POSC username.

5. Make the appropriate changes to your systems/business processes to comply with the *ASC X12 V5010 Implementation Guide* and the *MassHealth Standard Companion Guide*.

   • If you have a third-party vendor or use a third-party software, work with your vendors to have the appropriate software installed.

   • If testing the MassHealth system-to-system connectivity method interface, the Trading Partner or provider must work with your software vendor to have the appropriate software installed at their site(s) before performing testing with MassHealth.

6. Identify the functions you will be testing.

   • Health Care Eligibility/Benefit Inquiry and Information Response (270/271)

   • Health Care Claim Status Request and Response (276/277)

   • Health Care Payment/Advice (835)

   • Health Care Claim: Institutional (837I)

   • Health Care Claim: Professional (837P)

   • Crossover/COB Claims

7. Confirm you have reported all the NPIs you will be using by validating them with MassHealth. Make sure your claim(s) successfully pays to your correct Provider ID if you have associated multiple MassHealth Provider IDs to one NPI and/or taxonomy code.

   • If the entity is a billing intermediary or software vendor, they should use the provider's identifiers on the transaction.

8. When submitting files, make sure the members/claims you submit are representative of the type of service(s) you provide to MassHealth members.

9. If you determine that you will test the transaction, or testing is mandated by MassHealth.

   • Schedule a tentative week for the initial test; and

   • Confirm the name, email, and phone number of the primary testing contact.

Appendix B. Business Scenarios

This appendix contains typical business scenarios. Examples of the actual data streams linked to these scenarios are included in Appendix C.

    A.   Eligibility Inquiry Transactions by

        1.   MassHealth Member ID

        2.   MassHealth SSN Number/Other Agency ID

        3.   MassHealth Member Name

    B.   ACO Transactions

        1.   ACO(A) Member Eligibility Inquiry with Member Name (Name Inquiry)

        2.   ACO(A) Member Eligibility Inquiry with Member ID Example

        3.   ACO(B) Member Eligibility Inquiry with Member ID

           i.   Example 1

        4.   ACO(C) Member Eligibility Inquiry with Member ID

           i.   Example 1

          ii.   Example 2

    C.   Test Transactions

        1.   MassHealth 270 Test Transaction

        2.   MassHealth 271 Test Transaction

        3.   Provider Online Service Center – True Batch Example

Appendix C. Transmission Examples

This appendix contains actual data streams. The business scenarios linked to the data streams are included in Appendix B.

C. Test Transactions

In an effort to help Trading Partners validate their ability to submit transactions to MassHealth, we have established a test 270/271 transaction for Trading Partners to validate your HIPAA compliance and connectivity to MassHealth. To validate data submission, follow the 270 format shown below. A successful transmission may be validated by confirming that the 271 response you received matches the 271 response shown below.

If Trading Partners have confirmed that you have successfully sent the 270 and received the corresponding 271 in the exact format as shown, you are ready to submit production 270/271 transactions to MassHealth. If you experience transmission issues, please call the MassHealth Customer Service Center at (800) 841-2900.

3. Provider Online Service Center—True Batch Example

This is an example of a true batch file containing three individual inquiries. True batch has the ability to loop at the interchange, functional group, transaction, and hierarchical levels.

Appendix D. Frequently Asked Questions

This appendix contains a compilation of questions and answers. Typical questions would involve a discussion about code sets and their effective dates.

Q: **What are the main differences between the Web/POSC/Batch/DDE and the MassHealth CORE connectivity submission methods?**

A:
- Web access/POSC (DDE) - This option is best for those providers who have a low volume of MassHealth members, or want to check for specific members or other limited review of MassHealth member data. Web access also allows you to check the history of an earlier eligibility response you received.
- Web access/POSC (Batch file upload) - This option is best for providers who have large volumes of MassHealth members and need to upload eligibility request files and download the response. Typically, software vendors, billing intermediaries, clearinghouses, and providers with a technical team benefit from this option.
- MassHealth CORE connectivity allows Trading Partners to submit HIPAA transactions directly to MMIS via internet protocol using one of the two Envelope Standards; HTTP MIME Multipart (Envelope Standard A) or SOAP+WSDL (Envelope Standard B) to ensure a standardized safe harbor connectivity.

Q: **I have noticed three segments in my 270 that have a date. Which segment date should I use to define the date of service?**

A: The DTP segment is used to determine the date of service. If the DTP segment is not included in the transaction, the system date that the 270 transaction is processed by MassHealth is used as the date of service.

Q: **Is there a limit to the number of inquiries I can submit at once?**

A: Real-time transactions are limited to one inquiry per interchange. MassHealth agrees to the reasonable limit of up to a 3,000-member request per transaction and reserves the right to modify this limit as required, in accordance with the HIPAA standard. ST/SE segments that exceed this maximum number of members will be rejected.

Q: **What information is returned on the 271?**

A: All available information about the member will be returned. This may include

- Member address
- Member ID, social security number, and/or Other Agency ID
- MassHealth benefit plan
- MassHealth assignment plan
- Primary care clinician information
- Other insurance information
- Managed care information

- accountable care organization information
- member payment responsibility information
- long-term care information
- behavioral health information
- restrictive messages

Q: **Will I get back different information if I check by member ID vs. name?**

A: The information sent is specific to the member. The complete details are sent whether the inquiry is by member ID number or name.

Q: **Are any fields case sensitive?**

A: No.

Q: **Can I request future eligibility information?**

A: No. You may only request current date and historical dates. You may receive the following in your 271 response: "Date of service not within allowable inquiry."

Q: **Why did I not receive a 271?**

A: We recommend that you wait up to 2 – 24 hours after submitting your 270 to download your 999. Review the 999 and make sure that the 270 file was accepted. The 271 file should be available within the 2 – 24-hour time frame.

Q: **Where can I find a list of messages reported on the 271?**

A: Please refer to the MassHealth "Appendix Y: EVS Codes and Messages" document available on www.mass.gov. It contains a list of active Eligibility Verification System (EVS) codes. It also contains the associated service restriction messages.

Q: **Is testing required for implementing electronic batch submissions for eligibility requests and responses (270/271)?**

A: MassHealth does not require testing when implementing batch 270/271 transactions. You may send test files to the test environment; however, it is not required.

Q: **How do I transition from direct data entry (DDE) on the Provider Online Service Center (POSC) to submitting electronic batch eligibility?**

A: You will need software to generate the 270 and receive the 271 responses, in addition to receiving the 999 files. If you do not have software, you may contact any of the vendors listed on the MassHealth-Approved Vendor List, published on www.mass.gov that allows you to maintain HIPAA compliance. Your 270 file must be in the ANSI X12 standard format for 5010. You will need the Implementation Guide that is available for download from http://www.wpc-edi.com/ and the *MassHealth Standard Companion Guide 270*. Once you generate your 270 batch file, you may log into the PRODUCTION POSC and upload your 270 batch file. If you need assistance, please contact the MassHealth Customer Service Center at (800) 841-2900 or via email at edi@mahealth.net.

Q: **What does MassHealth accept as a "segment terminator" delimiter?**

A: MassHealth will accept a tilde (-).

Q: **What if I do not have software to generate a 270 or accept a 271?**

A: MassHealth publishes a list of approved vendors on the MassHealth website https://www.mass.gov/service-details/vendor-list that allows you to maintain HIPAA compliance. MassHealth updates this list periodically.

Q: **What do I do with the responses received in the 271?**

A: MassHealth recommends that you read the responses and follow the instructions, as applicable.

Q: **Why did my 270 transaction reject when I included only the member's name, date of birth (DOB), and gender?**

A: The file will reject when there is more than one member that exactly matches the member name (first name and last name), DOB and gender when the member ID (MID) is not included in the 270 request. To avoid this, MassHealth recommends including the MID in your 270 requests whenever possible.

Q: **Why did my 270 transaction reject when I included both the member's ID number and demographic data?**

A: MassHealth will validate the ID number submitted. If the ID number is invalid, the file will reject. If a request is submitted with demographic data (e.g. first name, last name, DOB,gender), if a single match is found eligibility information will be returned on the 271.

Appendix E. Change Summary

The following changes have been incorporated into this Companion Guide to comply with MassHealth's Member Cost Sharing Initiative: The following Loops and segments have been added, deleted or modified in this Companion Guide.

271 Outbound Changes

■ CO-PAY CAP STATUS PHARMACY — ADDITIONAL SEGMENTS HAVE BEEN ADDED TO THIS LOOP

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
291	2100C	EB01	Eligibility or Benefit Information	B	
				J	Members total accumulated copay amount
292	2100C	EB02	Benefit Coverage Level Code	IND	
293	2100C	EB03	Service Type Code	88	
299	2100C	EB06	Time Period Qualifier	34	
300	2100C	EB07	Monetary Amount		Member's copay amount will display here. If the copay amount is zero, a zero will display. Members who are exempt from copays will have an exempt message displayed. See MSG 01.
323	2100C	MSG01	Free Form Message Text		

■ CO-PAY CAP STATUS NON-PHARMACY — THIS LOOP AND SEGMENT HAS BEEN DELETED

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
323	2100C	MSG01	Free Form Message Text
